The objective of this project is creation of Marathi Reading Material in Sociology of Gender for students and researchers.

Sociology of Gender is a burgeoning sub-field. There is a paucity of good quality academic Marathi reading material and reference material across social science disciplines including Sociology of Gender. This paucity reflects in reproduction of commonsensical ideas about women's subordinate status in society by students. Creation of readers on basic concepts in Sociology of Gender could help solve this problem.

This project aims at translating one such text from English titled, 'Understanding Gender' written by Kamla Bhasin. This would clarify various aspects of the concept of gender, which is the most foundational one as far as this sub-discipline is concerned.
