

Admissions to University of Pune's Certificate Course in Solar Photovoltaic

It is proposed to conduct Certificate Course in Design, Installation and Commissioning of Solar Photovoltaic Systems in August 2014. It is expected that the certificate courses could be conducted from second quarter of FY2014-15 and aim is to conduct 5 programmes between August 2014 to December 2015.

Students who have graduated in Physics/Electronic Science/instrumentation, Diploma in Electrical/Mechanical/Instrumentations/Electronics Engineering and Degree in Electrical/Mechanical/Instrumentations/E&TC/Electronics/Production Engineering are eligible to apply for certificate course.

The idea is to build capacity in solar PV off-grid and grid connected systems in the backdrop of the National Solar Mission which has set a target of 20GW by the year 2022 of which country has already seen commissioning of about 2.5GW.

The programme is offered through the Department of School of Energy Studies of University of Pune. The students can see admissions for a maximum of 30 seats per batch.

The certificate course is offered on a quarterly basis with a total of 10 credits. University of Pune has entered into a Memorandum of Understanding with M/s. Arbutus Consultants Pvt. Ltd. to organise this programme.
