### **Objectives of the research project:**

The proposed research project aims at a comprehensive study on the challenges to the Indian society and culture in the age of globalization.

The proposed research project poses following research questions for further exploration.

1. How has process of globalization affected India's national and regional stability?
2. How has process of globalization made India more or less democratic?
3. Will globalization lead India to become global power?
4. Does globalization weaken Indian Social stability and Indian Culture?

These are the questions investigated with the help of descriptive exploratory survey method for evaluating the existing situation of the Indian society and culture in the age of globalization. In order to evaluate Indian policies towards globalization historical method will be used.

In the process of globalization there is positive and negative impact on the Indian society and culture. This research work would find out the challenges to the Indian Society and culture and suggest some of the alternative policy options to the government.
